Contents

ARTICLES PAGE

Opening Ceremony of the Tropical Products Institute. by H.R.H. The Prince Philip, Duke of Edinburgh, K.G., K.T., G.B.E. . . . 1

The Production of Hardboard from Tropical Timbers. IV. Caribbean Pitch Pine (*Pinus caribaea*). By D. F. Packman, *Forest Products Research Laboratory* 5

Exports of Essential Oils from British Colonies for 1953-57 . . 13

Domestic Exports of Essential Oils from the Commonwealth Countries for 1953-57 18

Some Problems of Jute Cultivation on the Coastland Soils of British Guiana. By G. D. Baxter, *Berbice Fibre Research Co. Ltd., British Guiana* 73

Myrobalans: An Important Tanning Material. By D. E. Hathway, *British Leather Manufacturers' Research Association* 85

Methods for the Reduction of Evaporation from Water Surfaces. By Mrs. S. G. Neish, Miss M. S. Orr and P. C. Spensley, *Tropical Products Institute* 107

The Effect of Storage for Different Periods of Time in Nigeria on the Quality of Groundnuts, with Special Reference to Their Value for the Manufacture of Protein Fibres. By A. Whiston and R. J. Hay, *Imperial Chemical Industries Ltd.* (*Fibres Division*) and W. D. Raymond, *Tropical Products Institute* 149

Sources of Starch in Colonial Territories, II: Arrowroot (*Maranta arundinacea* Linn). By W. D. Raymond and Miss J. Squires, *Tropical Products Institute* 182

Storage of Produce in the Gambia. By D. W. Hall, *Pest Infestation Laboratory* 193

The Control of Insects Infesting Groundnuts after Harvest in Gambia: I. A Study of the Groundnut Borer, *Caryedon gonagra* (F.) under Field Conditions. By A. A. Green, *Pest Infestation Laboratory* . . . 200

The Germination of Food-Crop Seed stored in Contact with Lindane and DDT Dust. By E. A. Parkin and Mrs. E. J. C. Scott, *Pest Infestation Laboratory* 206

CONTENTS

PAGE

Experiments in the Cultivation, Harvesting and Retting of Jute in British Guiana. By M. D. ffrench-Mullen 231

The Effects of the Placement of Ammonium Sulphate on the Yield of Rice in Northern Australia. By E. C. B. Langfield, *Commonwealth Scientfiic and Industrial Research Organization* 286

A Comparison of Lindane, DDT and Malathion for the Protection of Bagged Groundnuts from Infestation by *Tribolium castaneum* (Hbst). By A. A. Green and Miss J. Kane, *Pest Infestation Laboratory* . . 290

The Effect of Insect Infestation on the Quality of Decorticated Groundnuts. By Miss P. M. Davy and D. W. Hall, *Pest Infestation Laboratory*, and Mrs. P. L. K. Coveney, W. D. Raymond and Miss J. Squires (*Tropical Products Institute*) 296

REPORTS OF RECENT INVESTIGATIONS AT THE TROPICAL PRODUCTS INSTITUTE

Pulping Trials on *Pinus caribaea* Wood from British Honduras. By A. E. Chittenden and E. R. Palmer 22

Mangrove Bark from Sarawak. By Miss H. Bennett and R. D. Coveney 116

Wild Sesame Seed from Kenya. By J. A. Cornelius, W. D. Raymond and J. B. Ward. 212

NOTES

Utilization of Spent Tan Bark 19

Wild Yams from Jamaica 20

Kola Nuts 112

Nutmegs from Zanzibar 115

A Sample of Oleo-Resin from Mauritius 215

Cymbopogon afronardus Oil from Uganda 216

United Kingdom Market for Canned Pineapple 308

BOOK REVIEWS 41, 131, 219, 311

BIBLIOGRAPHY 48, 135, 223, 315

LIST OF ILLUSTRATIONS

OPENING CEREMONY OF THE TROPICAL PRODUCTS INSTITUTE

PAGE

PLATE I
The plaque in the Conference Room commemorating the official opening . . . . . *facing* 4

PLATE II
Prince Philip signs the Visitors' Book . . . . . *facing plate* III

PLATE III
Prince Philip examing the polarograph in the Insecticides and Drugs Laboratory . . . . . *facing plate* II

PLATE IV
General view of the Main Library . . . . . *facing plate* V

PLATE V
The Insecticides and Drugs Laboratory . . . . . *facing plate* IV

PLATE VI
Microscopical examination of pyrethrum flowers . . *facing plate* VIII

PLATE VII
His Royal Highness chats with the bookbinders . . *facing plate* VIII

PLATE VIII
Separation of pyrethrins in an alumina displacement column. . . . . *facing plates* VI, VII

PLATE IX
Prince Philip examines a standard sheet made from pulp from the trumpet tree (*Cecropia peltata*) . . . *facing* 5

THE PRODUCTION OF HARDBOARD FROM TROPICAL TIMBERS
IV. CARIBBEAN PITCH PINE (*Pinus Caribaea*)

PLATE I
The Laboratory Defibrator . . . . . *facing* 6

SOME PROBLEMS OF JUTE CULTIVATION ON THE COASTLAND SOILS OF BRITISH GUIANA

PLATE I
Complete failure of *C. capsularis* on 'mixed soil' as shown between the ranging pole and the drain in right foreground . . . . . *facing* 76

PLATE II
Failure of *C. olitorius* on pegassy clay showing bare ground in foreground and patchiness of the weed flora . . *facing* 77

PLATE III
Failure of *C. olitorius* on pegassy clay of lower aluminium content than that in Plate 2. This soil supports a greater variation of weed flora including grass species . *facing* 77

PLATE IV
C. olitorius showing stunted growth on deep sand in the foreground, and good growth on shell reef behind the ranging pole in the background . . . . . *facing* 80

MYROBALANS: AN IMPORTANT TANNING MATERIAL

FIGURE 1
Myrobalans from authentic *Terminalia chebula* . . . *facing* 86

PAGE

FIGURE 2
Belliric myrobalans, the dried fruit of *Terminalia bellirica* . *facing* 86

FIGURE 3
The dried fruit of *Terminalia citrina* . . . . . *facing* 87

FIGURE 4
The dried fruit of *Terminalia pallida* . . . . . *facing* 88

FIGURE 5
A battery of open vats connected for the purpose of counter current extraction . . . . . *facing* 102

FIGURE 6
Three batteries of open wooden vats for the counter-current extraction of myrobalans . . . . . *facing figure* 7

FIGURE 7
A bank of multi-effect evaporators used for the evaporation of myrobalans leach liquor . . . . . *facing figure* 6

FIGURE 8
Butts being lifted out of tan-pits in a sole leather tannery . *facing* 103

SOURCES OF STARCH IN COLONIAL TERRITORIES
II: ARROWROOT (*Maranta Arundinacea Linn*)

PLATE I
Arrowroot plants (*Maranta arundinacea*) . . . . . *facing* 184

PLATE II
Arrowroot rhizomes . . . . . *facing plates* III, IV

PLATE III
Harvesting arrowroot in St. Vincent . . . . . *facing plate* II

PLATE IV
Arrowroot awaiting transport to factory . . . . *facing plate* II

PLATE V
Final settling of starch (old type factory) . . . *facing* 185

PLATE VI
Root washing machines in the Central factory . . *facing* 185

PLATE VII
Arrowroot starch ready for shipment . . . . . *facing* 188

PLATE VIII
Apparatus for the examination of the viscosity behaviour of starch—Laboratory of the St. Vincent Co-operative Arrowroot Association . . . . . *facing* 188

THE CONTROL OF INSECTS INFESTING GROUNDNUTS AFTER HARVEST IN THE GAMBIA
I. A Study of the Groundnut Borer *Caryedon gonagra* (F.) under Field Conditions

PLATE I
A field stack of newly-harvested groundnuts . . . *facing* 200

PLATE II
Bagging groundnuts after threshing in the field . . *facing* 200

PLATE III
A small trader's secco of groundnuts . . . . . *facing* 201

PLATE IV
A large secco of groundnuts awaiting decortication . . *facing* 201

EXPERIMENTS IN THE CULTIVATION, HARVESTING AND RETTING OF JUTE IN BRITISH GUIANA

PLATE I
A good crop of E.C.R.–576 . . . . . *facing* 250

ILLUSTRATIONS

PAGE

PLATE II
A good crop of BZ–3 . . . . . *facing* 250

PLATE III
Digging out drain-heads with the Dinkum Digger . . *facing plates* V, VI

PLATE IV
Severe mite damage to apex of BZ–1 plant . . . *facing plates* V, VI

PLATE V
Cutting jute with a Ferguson mid-mounted mower . *facing plates* III, IV

PLATE VI
Cutting jute with a Cutrake. . . . . *facing plates* III, IV

PLATE VII
Removing jute from Cutrake . . . . . *facing plates* IX, X

PLATE VIII
The original Elcom ribboner . . . . . *facing plates* IX, X

PLATE IX
The Hay ribboner . . . . . *facing plates* VII, VIII

PLATE X
The Elcom ribboner converted to a trailed downstriker ribboner . . . . . *facing plates* VII, VIII

PLATE XI
The Enterprise ribboner . . . . . *facing* 251

PLATE XII
Ribboners at work . . . . . *facing* 251
